Case Study

Demolition & Extension
Luton

The Job

One of our biggest projects to date was won back in April 2019. This project involved part demolition of the property, leaving just two external walls and the floors of the existing building.

We built a double extension to the front of the property and a single extension to the rear. We then installed new internal walls to form all the rooms which consisted of

- the lounge
- kitchen/diner
- utility room
- WC
- 4No bedrooms
- main bathroom
- en-suite
- integral garage.

A new oak staircase was designed, built and installed as per the clients request and we supplied and fitted the appliances throughout.

We finished the project off by landscaping the front drive and rear garden as well as installing a side gate and slave leaf.

The clients were over the moon with the finished result and couldn't thank our guys enough for their hard work.
