

C WOOD & SON
LUTON LTD

Case Study

Under Stair Cupboard
Courtyard by Marriott, Luton Airport

The Job

C Wood and Son were employed by the Courtyard by Marriott Hotel at Luton Airport to carry out a small project in one of their stairwells.

Hotels are still able to operate during the Covid-19 Lockdown in England but only for key workers, those who have to travel for work, education and/or other legal purposes. However, the hotel were keen to get this small project completed whilst they still have guests.

For this project we:

- Cleared the materials/items from the area under the stairs and set aside.
 - Had to remove the existing stud wall.
- Installed a new stud wall with a 1 hour fire rating.
- Install 1hr fire door and frame for access.
 - Decorated the wall.
 - Decorated the door and frame.

This project was completed in 3 days.

Clients were happy with the finished result and the short time scale in which it was completed. Great effort from our guys.
