

C WOOD & SON
LUTON LTD

Case Study

Driveway
Luton, Bedfordshire

The Job

C Wood and Son were employed again by a previous client to carry out their driveway works after they were thoroughly impressed with their garage conversion we carried out earlier this year.

For this project we:

- Dug out the existing drive and section of grassed area, plus the area next to the gate.
- Installed edgings to both sides of drive and by the gate.
- Laid MOT type 1 and consolidated (150mm), then laid sand bed and consolidate again (50mm).
- Laid block pavements in medley mix smooth- frost grey and laid silver sand and vibrated.

This project was completed in 5 days.

Once again, a very happy client and a job well done from the team.
