

C WOOD & SON
LUTON LTD

Case Study

**Wetroom
Luton, Bedfordshire**

The Job

C. Wood & Son were employed by Luton Borough to carry out a disabled adaptations project for a family in Luton, Bedfordshire.

We converted their ordinary bathroom into a wetroom.

For this project we:

- Rip out the existing bath, including pipework.
- Hack off the wall tiles, repair and make good of the disturbed surfaces for the new tiles.
- Screed the floor with a fall to a trapped gully and run waste pipes.
- Installed the shower along with an L shaped shower curtain rail with white curtains.
- To install new basin and WC
- Tiled the three walls surrounding the shower from floor to ceiling.
- To install an extractor fan and LED vapour proof lighting.
- Clean the bathroom on completion.

This project was completed in 2 weeks and both the council and family were delighted with the finished result.
