Case Study

Roofing & Windows
Ashridge Golf Club

The Job

C. Wood & Son were employed by Ashridge Golf Club (working alongside Ashridge Surveyors) to re-roof a Grade II listed property on their premises.

This project was fairly tricky to undertake due to the extreme weather we experienced during the early parts of the year.

We had to take into account the health and safety of both the tenants living in the property, and our guys working at height in extreme weather conditions - meaning we had to pull of site a couple times until the rain and snow lightened.

For this project we:

- Re-roofed with reclaimed tiles
- Had new dormers built to the main house with oak windows
- Built new fascia's for the main house in our joinery shop and installed
- Decorated all the new timber to the roof of the main house.

This project was completed in 4 months.

The clients were very impressed with the final finish of the project.
