# Case Study

**Spire Repairs  
Dagnall, St Albans**

# The Job

C. Wood & Son were employed by the board and council of Dagnall Street Baptist Church in St Albans, to carry out the spire repairs to their church.

They'd have previously asked numerous contractors to carry out the works, which all refused. So it was down to us to get the job done...

For this project we:

- Erected a scaffold up to the spire to carry out a full investigation
- Installed sheeting around the base of the scaffold to prevent unauthorised personal climbing the scaffold
- Installed supports for the removal of rotten oak timber
- Removed rotten oak timbers and installed new to match the existing
- Carried out lead repairs
- Installed slates to the roof
- Primed, undercoated and glossed all timberwork to the spire
- Cleared site on completion

After many months of battling poor weather conditions and supplier delays, we finally completed the project in September 2023.

The finished works look incredible and we're incredibly proud to have undertaken this project that so many contractors refused.

We can't wait to see how the drone footage turns out!
