

C WOOD & SON
LUTON LTD

Case Study

**External Insulation
Luton, Bedfordshire**

The Job

C. Wood & Son were employed by a lovely couple in Luton, Bedfordshire to carry out their external insulation project.

They had been debating doing this for a long time and finally bit the bullet and went for it, and we're so pleased that they trusted us.

For this project we:

- Erected scaffolding round the property
- Took down the gable end brickwork and disposed of
- Built a new gable in blockwork
- Extended the verge to the front and rear of the roof
- Installed roof tiles and cement verge
- Extended rafters to the rear roof and installed new UPVC fascia and soffit
- Removed soil stack and disposed of
- Removed window boxes and set aside for reuse
- Installed 50mm insulation to all the exterior walls
- Installed Brick Slips to bottom half of walls to match the existing design
- Rendered the top half of the property to match the existing design with K-Rend
- Installed new UPVC soil stack
- Refitted the window boxes
- Took down scaffold and cleared site on completion

The client was thrilled with the finished result and couldn't speak more highly of the guys at the firm (you can find their testimonial on our website).

Well done team!
